

Hello, Dragon Families,

Welcome to West Point High School, the home of the Dragons!

We opened our doors on July 31, 2019, and have since grown to over 2,700 students. Our campus is state-of-the-art, designed to be collaborative and provide opportunities to engage in our STEAM (science, technology, engineering, arts, and mathematics) curriculum. Our campus includes an innovation center that houses makerspace classrooms, a gathering space for presentations, and access to our library resources. Our open quad area in the center of campus is an area where students can gather with their friends, read, study, and take a break. Our classroom designs are flexible and include natural light.

Our leadership academy provides students with an opportunity to challenge themselves with advanced placement and advanced courses, and to involve themselves in a leadership program to develop their own skills for college, career, and community service. It is our honor to have a strong relationship with Luke Air Force Base. Our students have the opportunity to learn about and see STEAM in action!

Our academic programs focus on preparing all our students for college and career. We have courses for all our learners to grow and excel. We have honors, advanced placement, and dual enrollment courses in multiple subjects. We offer physics, chemistry, biology, human anatomy, geology, and environmental science in our science department. Our world languages department provides courses in Spanish and Mandarin. Our career and technical education department boasts engineering, coding, digital communication, and business courses for our future entrepreneurs. We offer strong support systems for our students with IEPs and 504s. Our guidance team provides information and support throughout the year for all students.

We look forward to having our first senior class graduate in 2022. We are building athletics, clubs, and co-curricular programs in a variety of areas. We have a large variety of sports for students to become involved in. Our performing arts center is visually stunning, and will be busy with our talented students. We look forward to using it to showcase their work. Our musicians, dancers, actors, and other performers will be able to perform for audiences in a formal setting.

West Point HS Dragons are fierce and determined. They have shown that already in the hard work they have done so far. They are on **fire!** They focus, and they demonstrate integrity, respect, and excellence. Our committed staff help develop the students and this school into a model of excellence.

The sky is the limit for our talented students. Watch our Dragons take flight!

Brandi Haskins

West Point HS Principal
